CI242: Certified Erosion & Sediment Control Lead (CESCL)

Price: **\$369.00** | Type: **Virtual Class**

Credits: **17.5 PDHs / 1.75 CEUs** | Course Length: **17.5 Hours**

Program Overview:

This Ecology approved Certified Erosion and Sediment Control Lead (CESCL) certification is required to perform stormwater monitoring and inspections on construction sites.

This CESCL-"Hybrid" certification incorporates two learning modalities: Online/On-demand courses, and Live Virtual Instruction.

This program consists of:

- Six (6) Online/On-demand interactive courses that include embedded Field Videos, and
- One (1) 6-hour Virtual Instructor-Led Training (VILT) class.

The VILT day is broken into three (3) sessions. This video conference format allows you to communicate with your instructor and collaborate with fellow learners.

**Begin your online courses today
to prepare for one of the upcoming Live Virtual sessions below!**

- Thursday, January 16th at 9:00am PT
- Thursday, February 15th at 9:00am PT
- Thursday, March 27th at 9:00am PT

Trainer: Alex Zimmerman

CESCL certifications are valid for three (3) years.

Note: All construction projects within the State of Washington must designate at least one (1) person as the responsible representative in charge of Erosion and Sediment Control (ESC), and water quality protection. For projects larger than one (1) acre, the designated person shall be the CESCL who is responsible for ensuring compliance with all local, state, and federal erosion and sediment control and water quality requirements. (Local jurisdictions may require CESCL certification for sites less than 1 acre, neither does the CSWGP, except in limited cases.)

Program Objectives:

- Inspect and document the condition of stormwater BMPs as required by the Washington CSWGP.
- Sample stormwater and report the results as required by the Washington CSWGP.
- Maintain logbook and other permit-required documentation.
- Identify the job requirements of a Certified Erosion and Sediment Control Lead as expressed in the Washington CSWGP and BMP C160 of the Western Washington Stormwater Management Manual.
- Identify conditions and circumstances that may lead to stormwater compliance problems.
- Enlist the support of co-workers in permit compliance.
- Select and implement BMPs to prevent erosion, maintain stormwater quality, and remain in compliance with the Washington CSWGP.
- Provide technical oversight of installation and maintenance of construction stormwater BMPs.

CI242

■ **Courses Included:**

1. Washington CESCL Course

1 Washington CESCL Course

Online Courses:

1. Erosion Impacts, Process, and Factors
2. Washington CSWGP Regulations
3. SWPPP
4. Erosion Control Practices
5. Principles and Practices of Sediment Control
6. Pollution Prevention Practices

ONE-DAY Live Virtual Instruction:

- The Excellent CESCL
- Inspection and Sampling
- BMP Selection
